

Sneha Kulkarni

Python Full Stack Developer
sneha.kulkarni@example.com | +91 98765 10002

PROFESSIONAL SUMMARY

Python Full Stack Developer with hands-on experience building backend services, REST APIs, database-driven applications, and responsive web interfaces. Skilled in Flask, Django, FastAPI concepts, SQL, JavaScript, and Git. Interested in designing maintainable applications with clean architecture, reusable components, and secure authentication workflows.

TECHNICAL SKILLS

Python, Flask, Django, FastAPI, SQLAlchemy, REST APIs, MySQL, PostgreSQL, SQLite, React, JavaScript, HTML, CSS, Bootstrap, Git, Docker, PyTest

PROFESSIONAL EXPERIENCE

Python Developer Intern | CodeSphere Labs | Feb 2026 - Jul 2026

Developed Flask-based web applications and REST APIs for internal business workflows. Integrated SQLite and PostgreSQL databases using SQLAlchemy. Implemented authentication, form validation, error handling, and CRUD functionality. Worked with Git branches and pull requests and assisted in testing APIs and debugging application issues.

PROJECTS

Online Learning Platform

Built a web application using Django and PostgreSQL with user registration, course management, enrollment, and progress tracking. Designed models, views, templates, and authentication workflows.

Task Management Application

Created a Flask application for managing tasks with user authentication, priority levels, deadlines, and status tracking. Implemented CRUD operations and database relationships using SQLAlchemy.

Resume Analyzer

Developed a Python-based application that extracts resume text from PDF and DOCX files, compares candidate information with job descriptions, and displays match scores and missing skills.

EDUCATION

Bachelor of Engineering in Information Science and Engineering | Expected Graduation: 2027

CERTIFICATIONS

Python Programming, Flask Web Development, SQL and Database Fundamentals
