

Neha Desai

Cybersecurity Analyst
neha.desai@example.com | +91 98765 10006

PROFESSIONAL SUMMARY

Cybersecurity enthusiast with foundational knowledge of network security, vulnerability assessment, web security, Linux, security monitoring, and incident response concepts. Familiar with security tools such as Wireshark and Nmap and interested in identifying security risks and improving system defenses.

TECHNICAL SKILLS

Cybersecurity, Network Security, Linux, Wireshark, Nmap, Vulnerability Assessment, Python, OWASP Top 10, SIEM Basics, Cryptography Basics, Incident Response Basics, TCP/IP

PROFESSIONAL EXPERIENCE

Cybersecurity Intern | SecureNet Labs | Jan 2026 - Jun 2026

Assisted with basic vulnerability assessments in controlled environments. Used network scanning and packet analysis tools to understand exposed services and traffic behavior. Reviewed common web security issues based on OWASP guidance and documented observations. Participated in security awareness and incident response exercises.

PROJECTS

Network Security Scanner

Created a Python-based utility to identify open ports and collect basic service information in authorized test environments.

Web Application Security Assessment

Performed security testing on a deliberately vulnerable practice application and documented common issues such as weak input validation and insecure configurations.

Log Analysis Dashboard

Analyzed sample security logs to identify suspicious login attempts and unusual activity patterns.

EDUCATION

Bachelor of Engineering in Cybersecurity | Expected Graduation: 2027

CERTIFICATIONS

Introduction to Cybersecurity, Network Security Fundamentals, Ethical Hacking Basics
