

Rahul Sharma

AI and Machine Learning Engineer
rahul.sharma@example.com | +91 98765 10007

PROFESSIONAL SUMMARY

Aspiring AI and Machine Learning Engineer with strong interest in machine learning, deep learning, natural language processing, generative AI, RAG applications, Python, and vector databases. Experienced in building academic projects using TensorFlow, LangChain, Flask, ChromaDB, and embedding-based semantic search.

TECHNICAL SKILLS

Python, Machine Learning, Deep Learning, NLP, Generative AI, LangChain, RAG, ChromaDB, FAISS, Vector Databases, TensorFlow, PyTorch Basics, Hugging Face, Flask, SQL, Git

PROFESSIONAL EXPERIENCE

AI/ML Intern | Intelligent Systems Lab | Feb 2026 - Aug 2026

Worked on machine learning experiments involving data preprocessing, model training, and evaluation. Built small NLP and retrieval applications using embeddings and vector databases. Assisted in integrating AI models into Python applications and documented experiment results.

PROJECTS

AI Resume Analyzer

Developed an application that extracts resume content from PDF and DOCX files, performs section-based semantic chunking, generates embeddings, stores vectors in ChromaDB, and compares resumes with job descriptions. Added match scores, missing skills, history, and recruiter workflows.

RAG Document Assistant

Built a Retrieval Augmented Generation system using LangChain, embeddings, and ChromaDB. Implemented document chunking, semantic retrieval, and context-based answer generation.

Image Classification System

Trained a deep learning model using TensorFlow to classify images and evaluated performance using validation data.

EDUCATION

Bachelor of Engineering in Artificial Intelligence and Machine Learning | Expected Graduation: 2027

CERTIFICATIONS

Machine Learning with Python, Generative AI Fundamentals, Deep Learning Basics
